## El ction/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-44, and 54-83, drawn to a displaying game consol programs using a graphical user interface, classified in class 463, subclass 43.

II. Claims 45-53 and 84-86, drawn to a digital data processing system initialization or configuration, classified in class 713, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as claimed because the method of booting up a computer and performing system checks are not related to displaying the game consol programs using a graphical user interface.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Lewis Lee on 11/3/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
